RE: Solution Certification for the Product/Solution per the Referenced Documents ("Solution Certification Letter")

Per the terms of the Iridium Value Added Reseller Agreement (the "Agreement") between Iridium Satellite LLC ("Iridium") and Global Marine Networks LLC. ("Company") and based upon Company's fulfillment of all appropriate requirements as specified in the Reference Documents (including any specific requirements which may have been waived by Iridium as specified below), Iridium hereby provides **Provisional** Solution Certification of the following Company Product for commercial use in connection with the Iridium Communications System subject to the terms and conditions of the Agreement as well as this Solution Certification Letter:

Test Description:	Solution Certification Test of Global Marine Networks LLC XTracker (maritime tracking solution)
Equipment ("Product")	Xtracker Associated web site
Method of testing:	1. Self-Certification with Iridium review
Reference Documents	1. IRIDIUM Satellite Compliance and Test Requirements for Value Added Manufacturing (VAM) Products (REQ-01663-IR) Rev 1, Dec 2006 2. Iridium Solution Certification for SBD Applications 3. The Agreement
Specific Waived Requirements:	None
Acknowledged deficiencies not related to Iridium performance:	None
Corrective action required to eliminate deficiency	Not applicable.
Provisional Solution Certification	Due to the nature of this embedded solution, it is not possible to adequately test in a laboratory or simulated environment. Hence Provisional Certification is granted. In order to gain full Certification, the following actions are required to be completed: A. Submission of updated Test Report by Company to

	<p>Iridium, identifying specific IMEI's from at least ten XTrackers with at least 100 SBD Messages sent/received per XTracker per month in a real end-user environment for at least three months.</p> <p>B. Provisional certification can be removed after three months of data is available with fielded units that can be reviewed and no system anomalies or issues are detected in the CDRs for the application.</p>
--	--

This Solution Certification is strictly limited in scope to the specific Product and any specific capabilities defined in the Referenced Documents and successfully tested as described in the Test Description.

This approval is subject to:

- Renewal when there are any deviations from the description of the Product (e.g. hardware or software upgrades or changes); and
- The Company acknowledging that any SBD field application development must ensure that the customers using their SBD products will access the Iridium network spread out over time to the maximum extent possible. Any attempt by a large number of SBD products to simultaneously access the Iridium network may cause Iridium to withdraw this Solution Certification.

In the event that a significant Product defect (including a significant network or system defect which can reasonably be attributed to this Product) is identified subsequent to the issuance of this Solution Certification, Iridium reserves the right to withdraw the Solution Certification letter at any time at its sole discretion. Company shall cooperate with Iridium as necessary to evaluate the defect and to re-issue such Solution Certification.

Sincerely,

David Wigglesworth
Director – Data Services
