

Key benefits

- 1** Increase efficiency with optimised data connection and bandwidth
- 2** Control costs with built-in Internet usage control
- 3** Protect against unwanted traffic with unlimited firewall filtering
- 4** Built-in WiFi enables smart device connectivity
- 5** Increase crew morale

Optimizer Crew

Satellite Broadband WiFi HotSpot, firewall, and network solution

Optimizer Crew is a powerful Wi-Fi router that optimises a satellite broadband service to increase Internet efficiency, control costs and allow multi-person access.

Companies with remote crew workers in the field rely on satellite connectivity to keep their operations running. Having Internet and email access is vital for day-to-day business functions and for maintaining crew morale. However, to maintain operational efficiencies, it's important to be able to manage and control internet usage.

Optimizer Crew is a powerful and affordable satellite-optimised Wi-Fi router that gives you everything you need to efficiently manage multi-person networking over satellite internet.

Optimizer Crew enhances efficiency in a number of ways:

- > Firewall and filtering: Optimizer Crew's powerful firewall protects against unwanted traffic that is filtered and blocked to control airtime usage.

- > Web compression: automatically reduce data consumption by 3-5 times to help accelerate data speeds. In addition, with RedPort Mail Server, you can access your email with up to 20 times acceleration.
- > Captive portal: crew usage can be controlled and managed via PIN-code access control.

By pairing Optimizer Crew with Inmarsat's services, powered by our global satellite network, you can maximise Internet efficiency and cost effectively share and control multi-user access.

Inmarsat has certified Optimizer Crew as Inmarsat-ready. If you're looking to leverage the reliable global reach of Inmarsat's award-winning satellite network as your primary source of communications at remote sites, and want to cost-effectively manage your internet usage, Optimizer Crew is the perfect solution. Optimizer Crew has been certified for use over the following Inmarsat services:

- > BGAN
- > FleetBroadband

Features

- > Web compression service reduce data consumption by 3-5 times
- > Shared web compression
- > Powerful routing to manage multiple WAN networks
- > Firewall and filtering protection to manage traffic and block unwanted airtime usage
- > Captive portal with PIN-code to manage crew Internet usage
- > Access to manage local network from any internet connection
- > RedPort Mail Server provides up to 20 times acceleration for email access
- > GPS tracking to track remote assets

Advantages

- > Optimised Internet capability increase day-to-day operations and productivity
- > Controlled multi-user Internet access via built-in captive portal, controls costs
- > Access across computers, tablets and smartphones increase crew morale

Inmarsat coverage

Crew Optimizer is supported by Inmarsat's global network coverage and capability, ensuring you are never out of touch wherever you are.

 I-4 Americas  I-4 EMEA  I-4 Asia-Pacific

This map depicts Inmarsat's expectations of coverage, but does not represent a guarantee of service. The availability of service at the edge of coverage areas fluctuates depending on various conditions.

Inmarsat Certified

As part of our CAP (Certified Applications Partner) programme, Inmarsat works with a number of solutions providers to ensure that their products are not only compatible with our network, but provide our network users with effective, customer-focused solutions that offer genuine business benefits, whether they're using the network for voice, broadband, machine to machine connectivity or all three. Only individual solutions approved by Inmarsat are endorsed with the Inmarsat Certified logo.

About RedPort Global

RedPort Global develops products and services that advance data speeds, and enhance the overall user experience of satellite Internet. RedPort provides the fastest, most reliable and easy-to-use E-mail, web, and other hardware and software service.
